

Low Loss Flexible RG58 Type Coax Cable Double Shielded with Black PE Jacket

- Low Loss
- Double Shielded
- PE Jacket

Applications

- Antenna Feeds
- Communication Systems
- Wireless Systems
- Indoor / Outdoor Uses
- Direct Burial

Velocity of Propagation 80%

Shielding Effectiveness > 90 dB

• Jumper Cable Assemblies

Description

Flexible coaxial cable are ideal for applications where tight bends and continual flexure are required. Pasternack's PE-C195 is a low loss flexible RG58 type coax cable with PE jacket. The double shielding of this low loss cable provides better electrical performance than the standard RG-58 cable including excellent shielding effectiveness of better than 90 dB. This Pasternack cable's PE jacket makes it suitable for indoor/outdoor uses and direct burial applications. PE-C195 RG58 type datasheet specifications and outline drawing for this flexible cable are shown in the PDF below.

Pasternack carries a wide range of cables ready to ship same day to fit your needs. They are available in corrugated, flexible, formable or semi-rigid versions with different constructions of conductor materials, dielectric materials, shielding configurations and jacket materials. Our cables are designed to fit a wide range of performance criteria including attenuation, operating temperature, environmental factor, and power capability.

Electrical Specifications

| Description | Minimum | Typical | Maximum | Units |
|-------------------------|---------|--------------|---------|--------------|
| Frequency Range | DC | | 5.8 | GHz |
| Cutoff Frequency | | 41 | | GHz |
| Impedance | | 50 | | Ohms |
| Velocity of Propagation | | 80 | | % |
| Shielding Effectiveness | 90 | | | dB |
| Jacket Spark | | | 5,000 | Vrms |
| Nominal Capacitance | | 25.4 [83.33] | | pF/ft [pF/m] |
| Input Power (Peak) | | | 2.5 | KWatts |
