

## **RF Cable Assemblies Technical Data Sheet**

### PE3C4132

### Description

Pasternack's low PIM plenum cable assemblies using SPP-250-LLPL coax and N male to 7/16 DIN male connections are part of our full line of RF components available for same-day shipping. These N male to 7/16 DIN male plenum coax cable assemblies deliver low PIM performance to support Distributed Antenna Systems (DAS) and other complex, multi-carrier communication systems. The SPP-250-LLPL coax cable has been certified in accordance with UL910 for plenum coaxial cable installations. Each N male to 7/16 DIN male cable assembly is 100% tested for Passive Intermodulation (PIM) and the tested value is marked directly on the cable.

Our N male to 7/16 DIN male cable datasheet specifications and drawing with dimensions are shown below in this PDF. Whether the need is to provide a low PIM jumper connection, low PIM test cable or simply create a custom cable assembly configuration, Pasternack has the right cable assemblies for the job.

**Electrical Specification Notes:** 

PIM test results vary beween cables

Insertion Loss does not include the loss of the connectors. Insertion Loss is estimated as 0.4 dB connector loss.
