

N Plug to N Jack 30 Degree Adapter

PE910130

Configuration

- N Plug Connector 1
- N Jack Connector 2
- 50 Ohms Impedance
- 30 Degree Body Geometry

Features

- Max VSWR of 1.2:1 up to 18 GHz
- Gold Over Nickel-Phosphorus Alloy Over Copper Plated Beryllium Copper Contact

Applications

- General Purpose Test

Description

Pasternack's PE910130 type N plug to type N jack 30 degree adapter is part of our full line of RF components available for same-day shipping. Our type N to type N adapter has a plug to jack gender configuration built of durable stainless steel. PE910130 type N plug to type N jack adapter operates to 18 GHz. The Pasternack RF adapter provides excellent VSWR of 1.2:1 maximum. This 30 degree type N to type N adapter allows for easier connections in tight spaces.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
