#### Description

Pasternack's PE91270 2 hole flange RP SMA female to RP SMA female adapter is part of our full line of RF components available for same-day shipping. Our reverse polarity SMA to reverse polarity SMA adapter has a female to female gender configuration built of durable stainless steel. PE91270 reverse polarity SMA female to reverse polarity SMA female adapter operates to 18 GHz. The Pasternack RF adapter provides excellent VSWR of 1.2:1 maximum. This RF SMA 2 hole flange to SMA adapter allows designers to create external connections on their product enclosures, and can be used in a variety of other rack mount and panel mount applications.

RF adapters are often used to enable connections between two connector types that would otherwise not mate. Certain adapter configurations can also be used to protect connectors on expensive equipment where the number of connect/disconnect cycles is high. An RF, microwave or millimeter wave adapter is connected to the equipment, and the commonly changed connection is made with the adapter which can be easily replaced when it wears out after high usage; such adapters are referred to as connector savers. Pasternack also offers bulkhead, panel mount, hermetically sealed, reverse polarity, and isolated ground adapter varieties to serve all of your RF, microwave and millimeter wave needs.
